

Human Resources Management System SRS Changes to be updated and improvements proposed

User role creation

- Provide super admin with the functionality for creating user roles
- Super admin may create a number of default roles in which accounts will be created and users will be assigned later under that specific role.
- These roles do not have to be linked to the designation. the super admin can create and define custom roles
- Super admin can provide custom access levels to decide which functions are accessible to each role created

Create a defined dashboard

- Create a defined dashboard with summaries of all important sections
- For dashboards of HR management user roles the system should include counts of,
 1. employees available today
 2. employees on leave today
 3. annual request leaves
 4. upcoming appraisals

Create a notifications system in dashboard

- Sent notifications to the user to notify them about,
 1. when do they have leaves
 2. if an intern, internship period ending dates
 3. upcoming 6 months/ 3 months evaluations(review and assignment periods of employees)
 4. deadlines for specific tasks or projects
- After an employee has received approval from the department head(or the user role which has specific access to approve their leaves) notification sent to the rest of the team as that specific employee is on leave.
- Management level user roles receive a summary of all employees on leave

Employee management section

- Generate appointment letters for new employees
- Employees can create resignation requests which has to be approved by the user roles which have access for providing approval
- After a resignation request is approved system automatically generate resignation letter

- These appointment letters and resignation letters created are automatically added to employee profile personal files (along with laptop contract and other important documents which will be uploaded)

Attendance and time management

- Define how employees attendance will be recorded through clock in and clock out , whether there will need to be a specific person or a machine for recording attendance with in and out times of the employees

Leave management

- Integrate the work from home approval to the leave application , approval and rejection work flow mentioned in the leave management section

Remove the following sections

1. Payroll management
2. Performance management
3. Expense and claims management
